Release Notification and Corrective Action

OPERATOR

☐ Initial Report ☒ Final Report

Name of Company	ConocoPhillips Company	Contact	Sean Robinson
Address	3300 North A St. Bldg 6, Midland, TX 79705-5406	Telephone No.	575-391-3147
Facility Name	MCA Station 1	Facility Type	Oil and Gas
Surface Owner	Federal	Mineral Owner	Federal
		API No.	30-025-00783

LOCATION OF RELEASE

Unit Letter	Section	Township	Range	Feet from the	North/South Line	Feet from the	East/West Line	County
A	30	17S	32E					Lea

Latitude _____ Longitude _____

NATURE OF RELEASE

Type of Release	Crude Oil & Produced Water	Volume of Release	68bbls (40 oil, 28 water)	Volume Recovered	(30 oil, 20 water)
Source of Release	Thief Hatch on south water tank	Date and Hour of Occurrence	04/19/2012 0400	Date and Hour of Discovery	04/19/2012 0630
Was Immediate Notice Given?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom?	Trisha Bad Bear (BLM) & Geoffrey Leking (NMOCD)		
By Whom?	Justin Wright	Date and Hour	04/19/2012 0700		
Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.			

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.* Spill was caused by the north transfer pump getting trash in the pump which caused the pump to not move any fluid. Water level climbed resulting in tank overflow. Vacuum trucks were called to the site and removed 50 barrels of fluid.

Describe Area Affected and Cleanup Action Taken.* A total of 36,274 square feet of battery pad, lease road and pasture land was affected. Prior to RECS receiving the site from CoP, another environmental company completed initial assessment activities. Based on that company's assessment, a Corrective Action Plan (CAP) was submitted to NMOCD and BLM. NMOCD approved the CAP on March 13th, 2013 and BLM approved the CAP on March 22nd, 2013. RECS personnel were on site beginning on February 25th, 2014, to begin the approved CAP work. The release area to the east was excavated to a depth of 10 ft bgs. Once the excavation was completed, wall samples were taken and field tested for chlorides and organic vapors. Representative wall samples were sent to a commercial laboratory to verify that all constituents were below regulatory standards. The release area to the west was excavated to a depth of 3 ft bgs. At 3 ft bgs, a 5 point composite at the base of the excavation was field tested for chlorides and organic vapors. Since the field sampling returned clean data, further excavation on the west side ceased. The 5 point composite at the base of the excavation was taken to a commercial laboratory to confirm that all constituents were below regulatory standards. Wall samples were taken throughout the final west excavation and field tested for chlorides and organic vapors. Representative wall samples were taken to a commercial laboratory to confirm that all constituents were below regulatory standards. A total of 3,698 yards³ of contaminated soil was taken to a NMOCD approved facility for disposal. A total of 420 yards³ of clay was imported to the site to serve as a clay liner in the east excavation. Another 3,348 yards³ of top soil was imported to the site to serve as backfill. A sample of the imported top soil was taken to a commercial laboratory for analysis and returned a chloride value of non-detect. A 2 ft clay liner was installed into the base of the east excavation. Both excavations were then backfilled with the imported top soil to the surface and contoured to the surrounding location. On April 25th, 2014, the site was seeded with BLM mix #2.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
