Latitude 32 41.011

Longitude 103 47.730

## NATURE OF RELEASE

Type of Release	Produced water	Volume of Release	14bbls	Volume Recovered	9bbls
Source of Release	Flowline	Date and Hour of Occurrence	09-23-2013	Date and Hour of Discovery	09-23-2013 2:50pm
Was Immediate Notice Given?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input checked="" type="checkbox"/> Not Required	If YES, To Whom?			
By Whom?		Date and Hour			
Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.			
If a Watercourse was impacted, Describe Fully.*					
Describe Cause of Problem and Remedial Action Taken.*					
Weld failed on polyline. Inspect welds.					
Describe Area Affected and Cleanup Action Taken.*					
Initially 14bbls of produced water were released from a weld that failed on a polyline. We were able to recover 9bbls with a vacuum truck. All free fluids have been recovered. Tetra Tech will sample the spill site area to delineate any possible contamination from the release and we will present a remediation work plan to the NMOCD/BLM for approval prior to any significant remediation work.					
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
