Describe Cause of Problem and Remedial Action Taken.* <b>AUG 28 2014</b> <b>RECEIVED</b> Corrosion on nipple caused pinhole leak on injector inlet. Shut in well for repair.		
Describe Area Affected and Cleanup Action Taken.* On discovery of the spill, contacted and recovered the standing fluids. Visually impacted soils in the area were excavated to a depth of approximately two feet bgs and sent off for disposal. A four point composite confirmation soil sample was collected from the base of the excavation. These sampling results indicated a presence of chloride concentrations in shallow soils at levels of regulatory concern. In response to the sampling results, an additional site assessment was conducted to confirm the extent of soil impacts. Results of the additional assessment activities are provided in the attached report.		
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
