Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.*

N/A

Describe Cause of Problem and Remedial Action Taken.*

ENV - Reportable - + ~ 27 BBLs of PDW - MCBU - Permian - Hobbs - RR2.
On 09/17/13 @ ~0925 @ the Lockhart A-27 Battery located north of Eunice NM, there was an accidental discharge of ~27 bbls of produce water from a dresser sleeve on a 3" fiberglass line. While conducting his daily rounds a COPC employee noticed water on location at the Lockhart A-27 Battery location. Upon further Investigation COPC employee located the source of leak to be a dresser sleeve on a 3" fiberglass line. COPC employee shut in wells to contain leak, called a vacuum truck to recover fluids. Due to the sandy terrain only a 1/2 a bbls of PDW was able to be recovered. The spill site will be remediated in place in accordance with COPC and NMOCD guidelines.

Describe Area Affected and Cleanup Action Taken.*

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
