Describe Cause of Problem and Remedial Action Taken.* The valve malfunctioned causing the tanks to overflow releasing 100 barrels of produced water inside the facility. No fluids were recovered. The valve was repaired and the wells put back into service. Talon/LPE was contacted to complete the site assessment. Soil samples were collected to determine appropriate clean up actions.		
Describe Area Affected and Cleanup Action Taken.* The area affected was inside the facility. The impacted area measures approximately 10x80 feet.		
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
