Describe Cause of Problem and Remedial Action Taken.*
Steel oil tank developed a leak on sidewall near bottom of tank due to corrosion overtime. Leak developed and released 170Bbls of oil to tank battery earthen secondary containment berm. Approximately 5 Bbls of free oil was recovered from the secondary containment. Additionally, approximately 36 yards of contaminated soil was excavated from the secondary containment area and disposed of. Clean soil will replace removed soil and secondary containment re-built.

Describe Area Affected and Cleanup Action Taken.*
Area affected included only the secondary containment area. Clean-up consisted of: 1) Approximately 5 Bbls of free oil being recovered from the secondary containment, 2) Approximately 36 yards of contaminated soil being excavated from the secondary containment area and disposed of, and 3) Clean soil will replace removed soil and secondary containment re-built.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
