Describe Cause of Problem and Remedial Action Taken.*
Released was caused by ruptured poly line of approximately 20 bbls of produced water, recovering 15 bbls.
EOG proposes to collect soil samples of the impacted area to identify the extent of the contamination. Soil samples will be collected outside the impacted area to determine horizontal extent. Additional soil samples will be collected within the impacted area from surface to 5 feet below surface to determine the vertical extent of impacted soil. Proposed sampling plan is attached.

Describe Area Affected and Cleanup Action Taken.*
Based on the soil sample plan and analytical data received, EOG will visit with NMOCD and BLM to determine the best cleanup action for this incident.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
