NATURE OF RELEASE

Type of Release	Condensate and produced water	Volume of Release	Unknown	Volume Recovered	Unknown
Source of Release	Storage Tanks	Date and Hour of Occurrence	Unknown	Date and Hour of Discovery	Unknown (March 2013)
Was Immediate Notice Given?	<input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom?			
By Whom?		Date and Hour			
Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.			

If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*

A release of condensate and produced water associated a tank battery was identified in March 2013. The tank battery was removed and underlying soils were excavated (to a maximum depth of 20 feet below land surface) between approximately March and October of 2013.

Describe Area Affected and Cleanup Action Taken.\*

Currently, the surface of the area of interest (open excavation at this time) encompasses approximately 7,200 square feet. Merryman Construction Company and Conestoga Rovers & Associates excavated approximately 5,500 cubic yards of soil which was disposed at a Sundance Services, Inc facility. Site investigation activities have occurred, including collection and analysis of soil samples. The results of this testing are depicted on the attached figures and table. We understand that Mr. Geoff Leking of the NMOCD was informed of the release and that he indicated that groundwater was greater than 100 feet deep in the immediate area.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
