| Was a Watercourse Reached?<br><input type="checkbox"/> Yes <input checked="" type="checkbox"/> No  | If YES, Volume Impacting the Watercourse.  |  |

If a Watercourse was Impacted, Describe Fully.\* N/A

Describe Cause of Problem and Remedial Action Taken.\* A transport driver for Enterprise overflowed his tank causing a release of 10 barrels of crude oil on the Brown Crow Federal #1 (a Nadel and Gussman Permian location). A vac truck was immediately called to the location and recovered 7 barrels of oil. All fluids stayed on location. Talon/LPE personnel were immediately contacted for assessment and the correction of this release. Talon made an emergency One Call with NM 811 and started the same day doing emergency remediation activities.

Describe Area Affected and Cleanup Action Taken.\* The impacted area measured approximately 116-feet long by 20- feet wide on the flow path to the south. The flow path to the west measured approximately 85-feet long by 45-feet wide. The impacted areas of the release were excavated to a depth of 0.5-foot below land surface. The impacted soil was transported to Lea Land, LLC. Confirmation soil sampling was completed on 9/26/2014 and delivered to Cardinal Labs. The lab results are attached along with a site map and groundwater data for the area. The soil testing results are under the Recommended Remedial Action Levels (RRAL) after excavation activities. The excavated areas were backfilled to grade using new material transported from a local borrow pit. No further actions are required.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
