Attachments: Linn Energy Skelly Unit #2 AD - Vertical and SB Installation.jpg; Linn Energy Skelly Unit #2 AD - Excavations.jpg

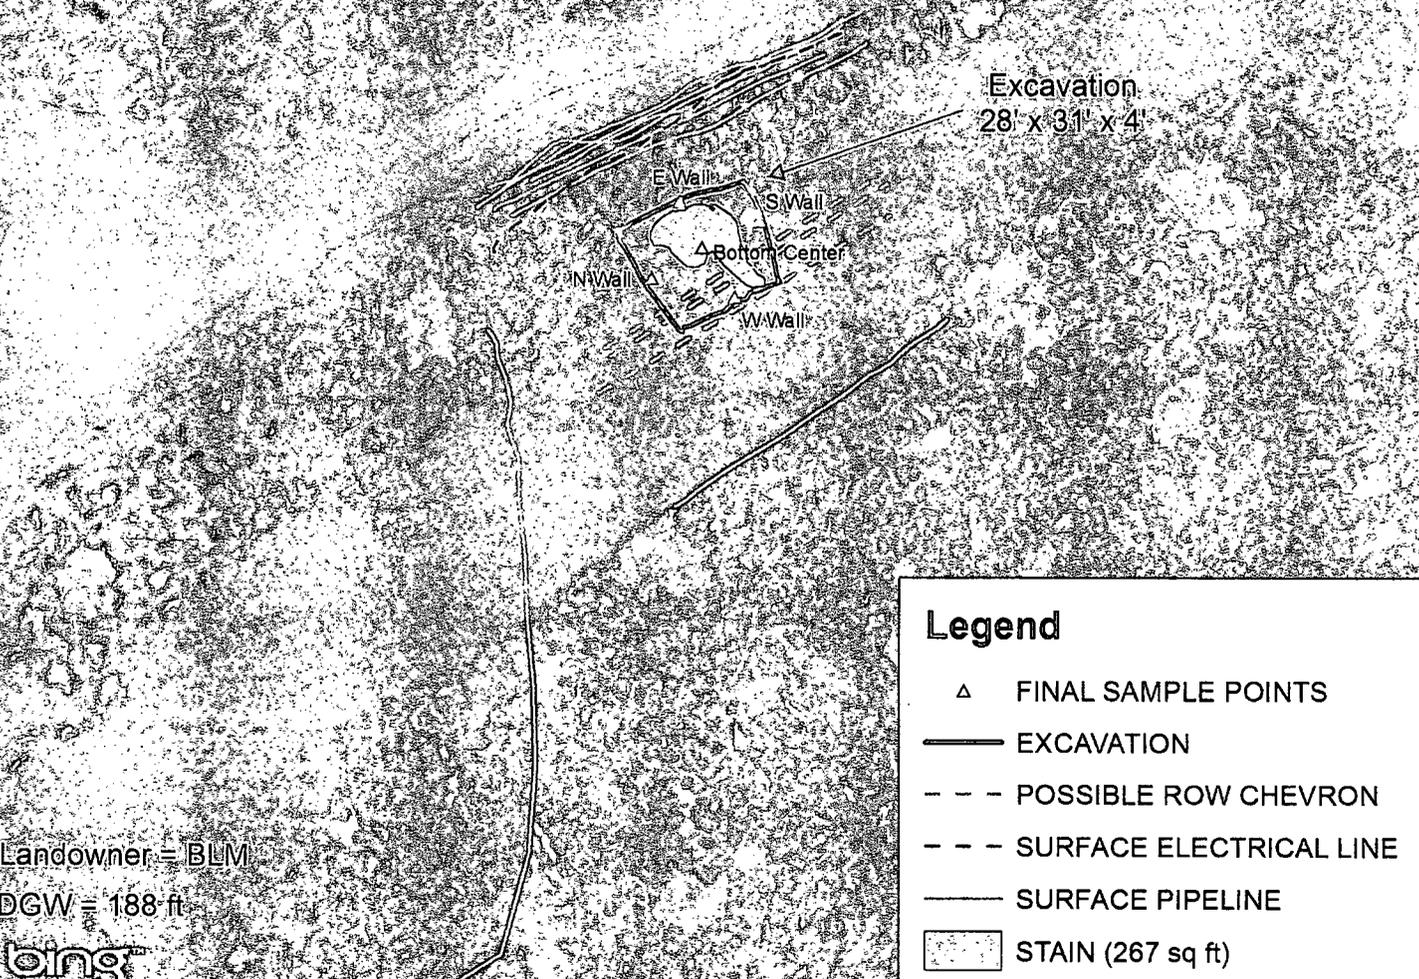

Gentlemen, attached is the vertical and SB data as well as the excavation data for the Skelly unit #2ad. As per the corrective action plan approved on May 3rd, 2013, the site has been excavated to a depth of 4 ft bgs or to a laboratory chloride level of 1,000 mg/kg. If no further actions are deemed necessary, we would like permission to backfill the site.

We appreciate the opportunity to work with you on this project. If you have any questions or concerns, please contact Hack Conder at (575) 631-6432 or me at the number below.

Subject: RE: Linn Energy skelly unit #2 ad

Jacob,

As we discussed, a liner will be installed at the 4' bgs interval and then backfilled. OCD concurs with BLM and approves the request to backfill at this site. NMOCD tracking number: **2RP-1293**

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.
