NATURE OF RELEASE

Type of Release Oil	Volume of Release 20 bbls	Volume Recovered 20 bbls
Source of Release Stuffing Box	Date and Hour of Occurrence 26Mar14	Date and Hour of Discovery 27Mar14 1000hrs
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Mike Bratcher	
By Whom? Carie Stoker	Date and Hour 27Mar14 1630 hrs voicemail	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse. N/A	
If a Watercourse was Impacted, Describe Fully.* N/A		

Describe Cause of Problem and Remedial Action Taken.*
Packing blew out of stuffing box. The well was shut in.

Describe Area Affected and Cleanup Action Taken.*
The release was contained to an area approximately 50' x 50' in the immediate vicinity of the well head and to the east. The impacted area around the well head and cellar was hand excavated to a depth of approx 2.5' BGS. Upon reaching a safe work area outside the cellar, a back-hoe was used to excavate the impacted soil. Upon reaching a depth of approx 1.5' BGS, extremely hard rock was encountered. Due to the close proximity of the well head, it was determined that it would be unsafe and impractical to continue further excavation at this time. Two soil samples were obtained and analyzed for Chlorides, TPH, and BTEX. Lab results were presented to NM OCD's Mike Bratcher along with the explanation of why it would be unsafe to use a hammer-hoe or drill to continue the remediation. Closure approval was given with the condition that a full remediation would be conducted at the time the well was P&A'd and the location was reclaimed. All impacted soil was transported to a division approved facility for disposal.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
