Re: **Application for Non-Standard Proration Unit**
Slick Mesa 27 State #1H (Re-Entry)
Section 27, Township 21 South, Range 34 East
Lea County, New Mexico

Dear Mr. McMillan:

Marshall & Winston, Inc. respectfully requests administrative approval for a Non-Standard Proration Unit for the referenced location.

The Slick Mesa 27 State #1H was originally planned to be drilled to a total measured depth of 15,325 ft., which is a 160 acre proration unit:

Surface Location:	660' FSL & 1980' FWL
Bottom Hole Location:	330' FNL & 1980' FWL

Marshall & Winston wasn't able to complete the horizontal portion of the well. We encountered drilling problems three-quarters of the way through the lateral. The bottom hole pressure in the lateral exceeded the pressure that our last casing shoe could handle, therefore making drilling operations unsafe to continue. We were able to reach a total measured depth of 14,198 ft. Our total depth only accounted for 120 acres of the 160 acre proration unit:

Surface Location:	660' FSL & 1980' FWL
Penetration Point:	1076' FSL & 2049' FWL
Bottom Hole Location:	1475' FNL & 1944' FWL

Attached is a Form C-102 showing the correct surface and bottom hole locations. Also attached is a letter from our Vice President of Land informing us that all interest owners have been notified and made aware of this proration unit change.

In summary, approval of this application will provide Marshall & Winston, Inc. the opportunity to sell the production from this location.

Dear Mr. McMillan:

Marshall & Winston, Inc. is the operator of the Slick Mesa 27 State #1H. As originally permitted it was our intent to drill the well with Tract 1 described above being the proration unit. Due to drilling difficulties we were only able to drill the well to cover a 120 acre proration unit being Tract 2 described above.

This is to inform you that all interest owners in the well have been notified. Marshall & Winston, Inc. and all working interest owners, who are all employees of Marshall & Winston, Inc., are aware that Tract 2 is the proration unit for the well.

Very truly yours,

Kevin Hammit
Vice President - Land
