If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*
Water leg plugged upon the gun barrel, causing all the water from the gun barrel to go to the 210 bbl oil tank. No alarm on oil tank. Clean out the plugged pipe and moitor.

Describe Area Affected and Cleanup Action Taken.*
Initially 1 bbl of oil and 510 bbls of produced water were released due to the water leg on the gun barrel was plugged. We were able to recover 1 bbl of oil and 459 bbls of produced water with vacuum trucks. The majority of the spill was contained in the lined facility. A 50' x 75' area adjacent to the location. All free fluid has been recovered. Remediation was completed by BBC International Inc. in accordance with the remediation plan approved by Mike Bratcher of NMOCD in a meeting on 02/19/2014.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
