Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse. NA	

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken. **Lightning struck tank battery, resulting fire completely destroyed tank battery facility. Fire compromised parts of the underlying secondary containment liner, but all released oil & water remained inside of berm area. Emergency Response actions were taken pursuant to state's rules and regulations. It appeared the oil released was consumed by the fire.**

Describe Area Affected and Cleanup Action Taken. **Emergency response actions consisted of fire fighting by local fire departments and water recovery by Gandy Corporation and hauled to GMI an approved OCD disposal. After site was released from Emergency Response Actions, Price LLC an Environmental Consultant collected surface and vertical samples under liner for submission of a remediation plan to OCD.**

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
