Describe Cause of Problem and Remedial Action Taken.\*

**RECEIVED**

**Due to downstream flow restrictions, Line 1002 line pressure built up causing the release of natural gas to the atmosphere from a pipeline overpressure protection valve. On arrival by Enterprise technicians, the valve had already closed. To avoid further pressure occurrences, operations personnel diverted the gas flow.**

Describe Area Affected and Cleanup Action Taken.\*

**No liquid spills occurred requiring any cleanup actions.**

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
