Oil Conservation Division 62201 South St. Francis Dr. Santa Fe, NM 87505 Form C-141 Revised October 10, 2003

Submit 2 Copies to appropriate District Office in accordance with Rule 116 on back side of form

Release Notification and Corrective Action

	OPERATOR	Initial Report
Name of Company Regency Field Services	Contact	Crystal Callaway
Address 801 S. Loop 464, Monahans, TX, 79756	Telephone No.	817-302-9407
Facility Name: Trunk "O" #3 (RP-1509) Lea County Field Dept.	Facility Type	Natural Gas Gathering
Surface Owner Mathew Casey Mineral Owner	r: Fee	Lease No.
LOCATION OF RELEASE		
Unit Letter Section Township Range Sect from the No. 27 22S 36E	rth/South Line Feet from the Ea	st/West Line County Lea
Latitude N32 21.511 Longitude W103 15.408		
NATURE OF RELEASE		
Type of Release Crude Oil, Produced water and Natural Gas	Volume of Release 50 Bbls Flu and 360 MCF Nat. Gas	d Volume Recovered 0 Bbls crude Oil and produced water
Source of Release 30" Natural Gas Pipeline	Date and Hour of Occurrence 7/23/07 4:15 p.m.	Date and Hour of Discovery 7/21/07 Time: 7:00 p.m.
Was Immediate Notice Given?	If YES, To Whom? NMOCD on call representative	
By Whom? Tony Savoie	Date and Hour: 7/21/07 7:15 p.m.	
Was a Watercourse Reached? ☐ Yes ☑ No.	If YES, Volume Impacting the Watercourse.	
If a Watercourse was Impacted, Describe Fully.*		
Describe Cause of Problem and Remedial Action Taken: A 30" Natural Gas gathering line developed a leak due to excess fluid delivered by a producer cause the line to pressure up and leak fluid and natural gas. Crews began shutting the line in at 7:45 pm. All of the fluid lost had soaked into the ground before the vacuum trucks arrived on site. Describe Area Affected and Cleanup Action Taken. Approximately 5,100 square feet of pasture land and approximately 3,672 square feet of caliche lease road was impacted by the release. No cleanup actions were taken at the time of the release. The final remediation will follow the NMOCD Guidelines for		
the remediation of leaks and spills. On or around August 15, 2007, remediation activities were conducted at the Trunk "O" #3. Release Site by an environmental contractor that is no longer affiliated with the site. On August 10, 2012, the site was revisited; the excavation floor and sidewalls were advanced until laboratory analytical results from confirmation soil samples indicated concentrations of chloride, BTEX and TPH were less than NMOCD regulatory remediation action levels.		
Please see the attached Basin Environmental Services Technologies Remediation Summary and Site Closure Request for details of remedial activities and laboratory analytical results from confirmation soil sampling.		
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or-file certain release notifications and perform corrective actions for releases, which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
