If a Watercourse was Impacted, Describe Fully.*		
Describe Cause of Problem and Remedial Action Taken.* At an unknown date and time the above ground storage tanks at the Trunk "C" Drip Tank Battery #16 failed causing a leak.		
Describe Area Affected and Cleanup Action Taken.* The drip tank facility has been removed from the current location. The site was reportedly remediated by Basin Environmental in 2013, impacted material was excavated and transported to Sundance for proper disposal. The excavation was lined and backfilled but not vertically delineated. In September of 2014 Apex personnel installed three (3) soil borings in order to vertically delineate the impact. Based on the information provided by Basin Environmental and the information collected by Apex personnel, the site has been determined to meet NMOCD regulatory standards.		
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
