NATURE OF RELEASE

Type of Release:	Crude Oil	Volume of Release	10 bbls Crude oil	Volume Recovered	None
Source of Release:	2 7/8" flow line near tank battery	Date and Hour of Occurrence	Not known	Date and Hour of Discovery	10/6/10 8:00 a.m.
Was Immediate Notice Given?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom?			
By Whom?		Date and Hour: 3/10/10 7:00 a.m. Left Msg. Returned call later			
Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.			

If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken: A 2 7/8" flow line developed a leak coming from the producing well to the battery. The well was shut in and one joint of tubing was replaced.

Describe Area Affected and Cleanup Action Taken.\* An area covering approximately 1,600 sq. ft. of pasture near the south side of the tank battery to the lease road was affected by the release. The oil soaked area was covered with fresh dirt to absorb the pockets of oil.

Laboratory analytical results from soil samples collected from the floor and sidewalls of the Golden 8 Federal Battery #1 Flowline excavation indicated concentrations of BTEX, TPH and chloride were less than NMOCD regulatory standards. Approximately 432 cy of impacted soil was excavated from the release site. Affected soil was transported to an NMOCD-approved disposal facility. On April 24, 2012, the excavation was backfilled with locally purchased non-impacted soil.

Please reference the attached Basin Environmental Services Technologies Remediation Summary and Site Closure Request for details of remediation activities.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases, which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
