RE: Temporary Permission Fee - Centurion Pipeline, LP Request for Renewal of Annual Temporary
Permission to Discharge Hydrostatic Test Water HBP - 032

Dear Mr. Jones,

Please find the enclosed temporary permission fee of \$150 payable to the Water Quality Management Fund for the above referenced annual discharge permit. Should you have any questions, please feel free to contact me at 713-215-7241 or dean_cox@oxy.com. Centurion appreciates your consideration and review of this application renewal.

Respectfully submitted,

Dean Cox
Environmental Specialist

RE: Centurion Pipeline, LP Request for Renewal of Annual Temporary Permission to Discharge
Hydrostatic Test Water HBP - 032

Dear Mr. Jones,

Centurion Pipeline, LP (Centurion), a subsidiary of Occidental Petroleum Corporation, is requesting that its Annual Temporary Permission to Discharge Hydrostatic Test Water Permit HBP – 032 be renewed. Centurion apologizes for filing this request beyond 45 days prior to the effective date of HBP-032, as is specified in the permit granting process, and will make every effort to ensure that future correspondences are submitted in a timely manner.

As required by the annual permit, all discharges will occur within Centurion's rights-of-way and will be performed in a manner that controls erosion and prevents discharging sediment from the site. Methods of controlling sediment may include: filter bags, detention basins, utilizing water trucks to spray test waters for dust suppression on the rights-of-way, working the test water into trench spoils to aid in compaction, or placing water in a trench and allowing it to percolate into the soil or evaporate.

The annual temporary permission authorizes Centurion to discharge hydrostatic test waters throughout the state of New Mexico under the following conditions:

1. The volume does not exceed 25,000 gallons per hydrostatic test;
2. Only water from a public/municipal water supply or other approved sources will be used for each test;
3. Centurion will provide oral or written notification to the Oil Conservation Division (OCD) 72 hours prior to each hydrostatic discharge event;
4. Test water will not enter any lake, perennial stream, river or their respective tributaries that may be seasonal;

5. No discharge shall occur:
 - a. Where ground water is less than 10 feet below ground surface;
 - b. Within 200 feet of a watercourse, lakebed, sinkhole, or playa lake;
 - c. Within an existing wellhead protection area;
 - d. Within 500 feet of a wetland; or
 - e. Within 500 feet from the nearest residence, school, hospital, institution, or church.
6. The discharge will not cause any fresh water supplies to be degraded and shall adhere to the standards as set forth in Subsections A, B, and C of New Mexico Administrative Code (NMAC) 20.6.2.3103 for maximum allowable concentration of contaminants in ground water unless existing conditions exceed the standard (New Mexico Water Quality Control Commission Regulation);
7. Best management practices will be implemented to contain the discharge onsite, ensure it does not impact adjacent property, and to control erosion;
8. The landowner(s) of each proposed discharge site and/or collection/retention or alternative discharge location will be properly notified of the activities prior to each proposed hydrostatic test event; and
9. Centurion will submit an annual report, summarizing all tests of new pipeline with less than 25,000 gallons per hydrostatic test event, to the OCD within 45 days following expiration of the Annual Temporary Permission to discharge. The report shall contain the following information:
 - a. Location of the hydrostatic test (Section, Township, Range or GPS coordinates);
 - b. Date of each test;
 - c. Volume of each discharge; and
 - d. Source and quality of test water (laboratory analysis, if necessary).

Enclosed is a filing fee of \$100 payable to the Water Quality Management Fund. Following receipt of the OCD approval of an Annual Temporary Permission to discharge, a permission fee of \$150 payable to the Water Quality Management Fund will be provided. Should you have any questions, please feel free to contact me at 713-215-7241 or dean_cox@oxy.com. Centurion appreciates your consideration and review of this application renewal.

RE: Centurion Pipeline, LP Request for Annual Temporary Permission to Discharge Hydrostatic Test Water

Dear Mr. Jones,

Centurion Pipeline, LP (Centurion), a subsidiary of Occidental Petroleum Corporation, is requesting Annual Temporary Permission to discharge hydrostatic test water from new crude oil pipelines in New Mexico. Discharges will occur within Centurion's rights-of-way, and will be performed in a manner that controls erosion and prevents discharging sediment from the site. Methods of controlling sediment include: filter bags, detention basins, utilizing water trucks to spray test waters for dust suppression on the rights-of-way, working the test water into trench spoils to aid in compaction, or placing water in a trench and allowing it to percolate into the soil or evaporate.

The annual temporary permission authorizes Centurion to discharge hydrostatic test waters throughout the state of New Mexico under the following conditions:

1. The volume does not exceed 25,000 gallons per hydrostatic test;
2. Only water from a public/municipal water supply or other approved sources will be used for each test;
3. Centurion will provide oral or written notification to the Oil Conservation Division (OCD) 72 hours prior to each hydrostatic discharge event;
4. Test water will not enter any lake, perennial stream, river or their respective tributaries that may be seasonal;
5. No discharge shall occur:
 - a. Where ground water is less than 10 feet below ground surface;
 - b. Within 200 feet of a watercourse, lakebed, sinkhole, or playa lake;
 - c. Within an existing wellhead protection area;
 - d. Within 500 feet of a wetland; or
 - e. Within 500 feet from the nearest residence, school, hospital, institution, or church.

6. The discharge will not cause any fresh water supplies to be degraded and shall adhere to the standards as set forth in Subsections A, B, and C of New Mexico Administrative Code (NMAC) 20.6.2.3103 for maximum allowable concentration of contaminants in ground water unless existing conditions exceed the standard (New Mexico Water Quality Control Commission Regulation);
7. Best management practices will be implemented to contain the discharge onsite, ensure it does not impact adjacent property, and to control erosion;
8. The landowner(s) of each proposed discharge site and/or collection/retention or alternative discharge location will be properly notified of the activities prior to each proposed hydrostatic test event; and
9. Centurion will submit an annual report, summarizing all tests of new pipeline with less than 25,000 gallons per hydrostatic test event, to the OCD within 45 days following expiration of the Annual Temporary Permission to discharge. The report shall contain the following information:
 - a. Location of the hydrostatic test (Section, Township, Range or GPS coordinates);
 - b. Date of each test;
 - c. Volume of each discharge; and
 - d. Source and quality of test water (laboratory analysis, if necessary).

Enclosed is a filing fee of \$100 payable to the Water Quality Management Fund. Following receipt of the OCD approval of an Annual Temporary Permission to discharge, a permission fee of \$150 payable to the Water Quality Management Fund will be provided. Should you have any questions, please feel free to contact Jennifer Hyre (505-254-1115; jhyre@swca.com) or me (713-215-7241; dean_cox@oxy.com). **Re: Annual Temporary Permission To Discharge Hydrostatic Test Water
Centurion Pipeline, L.P.
Permit: HBP - 032**

Dear Mr. Cox:

The Oil Conservation Division (OCD) has received Centurion Pipeline, L.P.'s (Centurion) request, initially received by OCD on November 13, 2014 and a revised submittal on November 19, 2014, for an annual temporary permission to discharge small quantities of hydrostatic test wastewater generated from the testing of new transmission pipelines of oil and gas or products thereof throughout the State of New Mexico. OCD acknowledges receipt of the filing fee (\$100.00) with the November 13, 2014 initial submittal. This approval will not become effective until OCD receives the temporary permission fee of \$150.00 pursuant to 20.6.2.3114 NMAC. Please make the check payable to the **Water Quality Management Fund**.

Based on the information provided in the request, annual temporary permission is hereby granted to Centurion for the discharge of the hydrostatic test wastewater generated from all new pipeline hydrostatic tests an operator may perform during an approved one-year period with the following understandings and conditions are applicable:

1. the volume does not exceed 25,000 gallons per hydrostatic test;
2. water from a public/municipal water supply or other OCD approved sources is used for each test;
3. email or written notification must be provided to the OCD 72 hours prior to each hydrostatic discharge event;
4. the discharge does not enter any lake, perennial stream, river or their respective tributaries that may be seasonal;
5. no discharge shall occur to a surface water body without obtaining a National Pollution Discharge Elimination Systems (NPDES) permit from the US EPA, NMED, and OCD prior to the discharge;

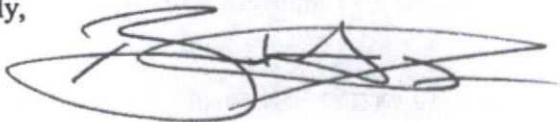

6. best management practices must be implemented to contain the discharge onsite, to ensure that the discharge does not impact adjacent property, and to control erosion;
7. the discharge does not cause any fresh water supplies to be degraded or to exceed standards as set forth in Subsections A, B, and C of the 20.6.2.3103 NMAC (the New Mexico Water Quality Control Commission Regulations);
8. Centurion shall report all unauthorized discharges, spills, leaks and releases of hydrostatic test water and conduct corrective action pursuant to OCD Rule 19.15.29 NMAC;
9. the landowner(s) of each proposed discharge and/or collection/retention or alternative discharge location must be properly notified of the activities prior to each proposed hydrostatic test event; and
10. an annual report, summarizing each test of new pipeline with less than 25,000 gallons per hydrostatic test event, will be submitted to OCD within 45 days after the temporary permission expiration date and shall contain the following information:
 - a. the location of hydrostatic test (Section/Township/Range or GPS coordinates);
 - b. the actual date of each discharge;
 - c. the volume of each discharge; and
 - d. the source and quality of test water (laboratory analysis, if necessary).

Annual temporary permissions shall expire one (1) year after issuance. This temporary permission will expire November 19, 2015. Renewal requests for annual temporary permission to discharge shall be submitted forty-five (45) days prior to the expiration date. An annual temporary permission may be revoked or suspended for violation of any applicable provisions and/or conditions of the permit.

This approval does not relieve Centurion of responsibility should its operation result in pollution of surface water, ground water, or the environment. In addition, OCD approval does not relieve Centurion of responsibility for compliance with other federal, state or local regulations.

If there are any questions regarding this matter, please do not hesitate to contact me at (505) 476-3487 or brad.a.jones@state.nm.us.

Sincerely,

Brad A. Jones

RE: Centurion Pipeline, LP Request for Annual Temporary Permission to Discharge Hydrostatic Test Water

Dear Mr. Jones,

Centurion Pipeline, LP (Centurion), a subsidiary of Occidental Petroleum Corporation, is requesting Annual Temporary Permission to discharge hydrostatic test water from new crude oil pipelines in New Mexico. Discharges will occur within Centurion's rights-of-way, and will be performed in a manner that controls erosion and prevents discharging sediment from the site. Methods of controlling sediment include: filter bags, detention basins, utilizing water trucks to spray test waters for dust suppression on the rights-of-way, working the test water into trench spoils to aid in compaction, or placing water in a trench and allowing it to percolate into the soil or evaporate.

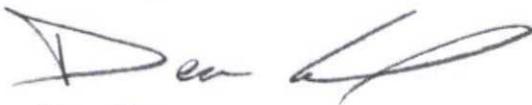

The annual temporary permission authorizes Centurion to discharge hydrostatic test waters throughout the state of New Mexico under the following conditions:

1. The volume does not exceed 25,000 gallons per hydrostatic test;
2. Only water from a public/municipal water supply or other approved sources will be used for each test;
3. Centurion will provide oral or written notification to the Oil Conservation Division (OCD) 72 hours prior to each hydrostatic discharge event;
4. Test water will not enter any lake, perennial stream, river or their respective tributaries that may be seasonal;
5. No discharge shall occur:
 - a. Where ground water is less than 10 feet below ground surface;
 - b. Within 200 feet of a watercourse, lakebed, sinkhole, or playa lake;
 - c. Within an existing wellhead protection area;
 - d. Within 500 feet of a wetland; or
 - e. Within 500 feet from the nearest residence, school, hospital, institution, or church.

6. The discharge will not cause any fresh water supplies to be degraded and shall adhere to the standards as set forth in Subsections A, B, and C of New Mexico Administrative Code (NMAC) 20.6.2.3103 for maximum allowable concentration of contaminants in ground water unless existing conditions exceed the standard (New Mexico Water Quality Control Commission Regulation);
7. Best management practices will be implemented to contain the discharge onsite, ensure it does not impact adjacent property, and to control erosion;
8. The landowner(s) of each proposed discharge site and/or collection/retention or alternative discharge location will be properly notified of the activities prior to each proposed hydrostatic test event; and
9. Centurion will submit an annual report, summarizing all tests of new pipeline with less than 25,000 gallons per hydrostatic test event, to the OCD within 45 days following expiration of the Annual Temporary Permission to discharge. The report shall contain the following information:
 - a. Location of the hydrostatic test (Section, Township, Range or GPS coordinates);
 - b. Date of each test;
 - c. Volume of each discharge; and
 - d. Source and quality of test water (laboratory analysis, if necessary).

Enclosed is a filing fee of \$100 payable to the Water Quality Management Fund. Following receipt of the OCD approval of an Annual Temporary Permission to discharge, a permission fee of \$150 payable to the Water Quality Management Fund will be provided. Should you have any questions, please feel free to contact Jennifer Hyre (505-254-1115; jhyre@swca.com) or me (713-215-7241; dean_cox@oxy.com).
