Terry,

As discussed, the drilling rig has become available for the end of the week. Tetra Tech will be onsite Thursday (4-7-10) on the Skelly #967 Tank Battery to install boreholes to define vertical extents. The Jenkins site will be performed on Friday (4-9-10). Once completed, the work plans will be prepared and submitted for review and approval. Please call me if you have any questions, thanks

Pat, this is to notify you we had a flow line leak at our Jenkins #7 well. 100bbl produced water out, 80bbl recovered. Split in 3" poly line. Standing water has been removed, in the process of digging out flow line to make repairs. Closest well to leak: DK McIntyre #8 Sec 17,T17S,R30E Eddy Co. I have NOT made notification to State or Fed, this is Fed. Will you contact them? Confirm you received this.

Mike and Terry,

If weather permits, Tetra Tech will start the soil remediation of the Jenkins B Federal #7 (flow line leak) on Monday (9-27-10). A work plan for the site was submitted and approved by the NMOCD and BLM. Tetra Tech will contact Terry Gregston to inspect the excavation, confirmation sampling and liner installation before backfilling the site. Please call me if you have any questions, thanks
