Reference: Linn Operating \* Max Friess & Fren Supply Line (Turner B 12) \* 30-015-05284 \* L-20-17s-31e \* Eddy County, New Mexico

NMOCD Tracking number: 2RP-2033 \* Date of release: 5/20/13

Lara,

Your proposal for remediation of the above referenced release is approved. Remediation projects on federal sites will require like approval by BLM. In the area identified in the CAP as SP-1, if there is analytical data available from the interval between surface and 8', please provide that data to OCD. In the area identified as SP-2, if there is analytical data available from the interval between surface and 20', please provide that data as well. If there is no data available from these intervals, samples may be required to be obtained for analyses from the excavation bottom in these areas, prior to liner installation/backfill.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.
