**If a Watercourse was Impacted, Describe Fully.\*** N/A

**Describe Cause of Problem and Remedial Action Taken.\***

On April 14, 2015 10:00 AM the Lease Operator arrived at the Hackberry 18 Fed 1 and discovered the separator at the Sirius 17 Fed 6H had been swamped sending fluid to the Hackberry Compressor Stations gas separator and then to the oil tank at the Hackberry 18 Fed 1 running the oil tank over spilling 45bbls oil in unlined containment and 1/2bbl oil mist in to pasture.

**Describe Area Affected and Cleanup Action Taken.\***

The affected area was 45bbls in an unlined containment and a 1/2bbl mist in to a 80'x30' area Southwest of location in to the pasture. All 45bbls in unlined containment were recovered by vac truck. The contaminated dirt on location will be removed and filled with fresh dirt and the pasture will be raked and pressure washed with Dawn soap.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
