Subject: Oxy McCall #2 Battery
Attachments: Remediation Packet- McCall #2-2.pdf

Mike,

This e-mail is to confirm our discussion on December 17, 2012 concerning the remediation plan for the release that occurred at the Oxy McCall #2 Battery. I have attached the site drawing and the summary of the laboratory data we reviewed during our discussion for your files. As agreed, Oxy will surface scrape in the areas covered by SP1, SP2, SP3, and SP4 and will excavate to 3 feet in depth in the areas covered by SP5 and SP6 as depicted on the attached site diagram. A composite confirmation sample will be taken from the surface scraped area and bottom confirmation sample will be taken from the 3 foot excavated area. These samples will be analyzed for TPH and BTEX. The excavation will then be backfilled with clean soil. The depth to groundwater in this area is approximately 50 feet.

If you would please reply back via e-mail with your concurrence of this remediation plan, it would be greatly appreciated.

Oxy and I thank you for your assistance in handling this matter.

Thanks, Cliff
