Kimberly,

The proposal for remediation of the above referenced release, submitted to OCD by Talon, LPE, is approved, with the following conditions and/or stipulations. In the areas identified as S-3 and S-4, deeper delineation will be required due to elevated TPH and BTEX. Excavation depth for this area will be based on the delineation results. Like approval by BLM is required on Federal sites.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.
