Describe Cause of Problem and Remedial Action Taken.*
During loading procedures the driver for Great Lakes Transport overflowed his transport truck.

Describe Area Affected and Cleanup Action Taken.*
Talon/LPE excavated the saturated soil from the impacted area on the location to a depth of 2-feet deep and the flow path to a depth of 1-foot deep. The impacted soil was transported to Lea Land, LLC for disposal. Talon/LPE backfilled the area with soil to match the surrounding terrain and a 250'x75' berm was installed in the southeast corner of the location. Micro blaze was applied to the impacted area of the rip rap.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
