Describe Cause of Problem and Remedial Action Taken.*
The 2" steel flow line going from the NSLU #145 to the battery developed a pin hole approximately 60 yards off location and out in the field. It spilled approx. 7bbls of oil.

Describe Area Affected and Cleanup Action Taken.*
2bbls were recovered by vac. Truck. A clamp was put on the pipe to cover the hole. Will follow the BLM procedure of scrapping up contaminated ground.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
