	By Whom? Josh Russo	Date and Hour 08/15/2012 8:50 a.m.				
[3]	Was a Watercourse Reached?	If YES, Volume Impacting the Watercourse.				
1919	Yes 🛛 No	N/A			NOV 02 2012	
_	If a Watercourse was Impacted, Describe Fully.*					
	Describe Cause of Problem and Remedial Action Taken.*					
	While preparing a new well pad a dozer accidently hit a buried injection line from the BKU #112 causing the release of fluid onto the site. The line has been repaired and returned to service.					
8) [Describe Area Affected and Cleanup Action Taken.*					
	COG conducted an emergency cleanup of the spill. Soil exceeding the RRAL for TPH and BTEX were removed and transported to proper disposal. Once excavated, Tetra Tech collected confirmation samples from the open excavation. Based on the results, the excavation was backfilled with clean soil and then brought up to surface grade. Tetra Tech prepared a closure report and submitted it to NMOCD for review.					
	I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger					
	public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human heal					
	or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other ederal, state, or local laws and/or regulations.
