Describe Cause of Problem and Remedial Action Taken.\*

A truck had ran over an above ground poly line causing damage to the line releasing 100 bbls of produced water with 0 bbls recovered.

Describe Area Affected and Cleanup Action Taken.\*

Talon/LPE excavated the saturated soil from the impacted lease road to a depth of 1-2 feet deep and approximately 1,200-feet in length. The excavated material was transported to a NMOCD approved Solid Waste disposal facility. Talon/LPE backfilled the area with new material transported from a local borrow pit. The backfill material was contoured to match existing lease road.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
