Re: Snapping 2 State 15H
Section 2-T26S-R31E
Eddy County, New Mexico

Gentlemen:

Devon Energy Production Company, L.P. ("Devon"), as Operator, plans to drill the referenced horizontal Bone Spring well to a total vertical depth of approximately 10,225' with a total measured depth of approximately 14,750'. As reflected on the attached C-102, the well has been permitted at a surface location of 200' FNL and 880' FEL with a permitted bottom hole location of 330' FSL and 1,320' FEL of Section 2, Township 26 South, Range 31 East.

The reasoning behind permitting this well at an unorthodox location is the intention to perform a downspacing test within Section 2, for the purposes of testing recovered reserves.

In accordance with Division rules, Devon respectfully requests that the Commission administratively approve this application for an unorthodox location with respect to that portion of the horizontal wellbore as described above in accordance with Division Rule 104(F) (3).

Attached for your review you will find a State of New Mexico form C-102.

Feel free to contact the undersigned at (405) 228-4342 if there are any concerns or questions regarding this application.

Yours truly,

DEVON ENERGY PRODUCTION COMPANY, L.P.

The figure is a technical survey map titled "SURVEYOR CERTIFICATION". It depicts two rectangular sections of land, each subdivided into four corners. Key features include:
- **Coordinates**: Latitude and longitude values are provided for every corner point, as well as North Magnetic South Points (NMSP).
- **Well Location**: A specific point is identified as the "WELL LOCATION" with a depth of 200 feet.
- **Lot Designation**: The areas are labeled as LOT 1, LOT 2, LOT 3, and LOT 4.
- **Corner Descriptions**: Corners are described using standard surveying notation (e.g., NW CORNER SEC. 2, E/4 CORNER SEC. 2).
- **Scale and Orientation**: A scale bar at the bottom indicates a distance of 1310 feet. The map is oriented with North at the top.
- **Certification Details**: To the right of the map, there are two certification sections. The "SURVEYOR CERTIFICATION" section includes a statement of truthfulness, a signature of Linda Good dated 4/17/2015, her printed name, and email address. The "OPERATOR CERTIFICATION" section includes another statement of truthfulness, a date of survey (April 8, 2015), a signature, and a reference to certificate number 12797 and survey number 3800B.

Mike,

The NW/4 NW/4 is 40 acres. For some reason, even though these quarter-quarters are referred to as Lots in the land description, they appear to all be 40 acres in this Section.

Have your engineers look at the survey-the NW/4 NW/4 and SW/4 SW/4 are greater than 40-acres- so the 1320 may work-10H

Section 2-T26S-R31E
Eddy County, NM

Gentlemen:

Attached you will find Devon Energy Production Company, L.P.'s planned C-102 for the subject well. Upon completion of said well, the last perforation will be perforated at a location of 1,310' FEL and 375' FSL of Section 2. Devon has since filed an application for unorthodox location. Our records indicate that XTO Energy, Inc., as a working interest owner of that portion of Section 11-T26S-R31E, is an affected owner of an offset spacing unit and is entitled to notice of this application in accordance with Division Rule 104(f). Objections to this application should be submitted to the New Mexico Oil Conservation Division within twenty (20) days of receipt of this letter. If you have no objection to this application, please so indicate by signing and returning one copy of this letter to the undersigned.

If there are any questions or if additional information is required, feel free to call me at (405) 228-4342.

Yours very truly,

DEVON ENERGY PRODUCTION COMPANY, L.P.

For the Snapping 2 State 10H, the BHL cannot land on a quarter-quarter section. So you will need to move the BHL. I also do not see penetration point and final perforation.
It appears to be the same for the Snapping 2 State 15H
