Describe Cause of Problem and Remedial Action Taken.* A gasket failed on the heater-treater man-way plate. The well was shut in and the gasket was replaced. All free standing fluid was removed with a vacuum truck.													
Describe Area Affected and Cleanup Action Taken.* The spill impacted approximately 6,750 sq.ft. of process containment area that had the base soil treated with a bionic soil solution during construction, samples were collected at 6" intervals to a depth of 3 ft. to check for oil and water saturation. The spill misted and area of approximately 3,425, sq. ft in the pasture. Soil samples were collected and field tested for chloride saturation depth in the pasture area. The lab results and soil chemistry tables are attached. The remediation activities began on 11/12/14 and were successfully completed on 2/8/14, however before the final backfill with gravel was completed there was another spill directly on top of the remediated area. Please find the attached Soil Closure Request dated May 2015 that addresses both spills, (2RP-2615 and 2RP-2810.													
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
