Latitude N 32.346280 Longitude W 103.835916  NATURE OF RELEASE  Type of Release: Produced water  Volume of Release: 10° lay flat hose to pump connection from the JRU- 95014 at 7.45 p.m.  Was Immediate Notice Given?  Yes No Not Required Heather Patterson (voice mail)  By Whom? Tony Savoic  Was a Watercourse Reached?  Yes No Date and Hour: 10°/L/14 at approximately 9.90 a.m.  If YES, Volume Impacting the Watercourse.  Describe Cause of Problem and Remedial Action Taken.*  A flange connection from the frac hose to the water transfer pump broke. The water transfer pump was shut down until the broken flange could be replaced.  Describe Area Affected and Cleanup Action Taken.*The release impacted approximately 12,476 sq.ft. of pasture. All of the free standing fluid was recovered with vacuum trucks. Basin Environmental collected soil samples throughout the pond area on 10/214 to help determine the amount of PW lost in the soil. BOPCO is in the process of obliatining permission from the State Land Office to access and remediate the area.  In the process of obliation activities on 10/22/14 and completed the field work on 3/11/15. Please reference the attached Soil Closure Request dated April, 2013  In the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and required to report and/or file certain release notifications and preferre corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report dose not relieve the operator of liability should their operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. In addition, NMOCD acceptance of a C-141 report dose not relieve the operator of repassibility for compliance with any understand the report and/or regulations. in the soil. BOPCO is in the process of obtaining permission from the State Land Office to access and remediate the area.  Basin Environmental began the remediation activities on 10/22/14 and completed the field work on 3/11/15. Please reference the attached Soil Closure Request dated April, 2015  I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
