**Subject:** Form C-141 Final Report (Chamaeleon BIN State Com. #1-H)  
**Attachments:** Chamaeleon BIN State Com. 1-H.pdf

Mike,

Based on analytical results with low chlorides (234 ppm) at 12" and unable to delineate deeper due to auger relief, YPC requests closure.

Thank you.

**Subject:** RE: Minor Release

Bob,

I would prefer to see some analytical data, especially with no soil removal. I wouldn't expect to see much there, but with the site ranking considered, I think some sampling would be necessary.

Thanks,

Mike Bratcher

**Subject:** Minor Release

Mike,

Yates had a minor release at the Chamaeleon BIN State Com. #1-H (12B/PW released with 10 B/PW recovered, on 12/3/2013), the site ranking is a 20 based on the ChevronTexaco trend map. The release stayed on the well pad and the pad was back dragged. With the amounts recovered and that it stayed on the pad, but with the site ranking will delineation samples be required or can Yates submit an Form C-141 Initial/Final Report (which will be submitted today, 12/18/2013).

Thank you.
