CALLED BY THE OIL CONSERVATION
COMMISSION OF NEW MEXICO FOR
THE PURPOSE OF CONSIDERING:

CASE NO. 433
ORDER NO. R-222

THE APPLICATION OF SHELL OIL
COMPANY FOR AN ORDER GRANTING
PERMISSION TO DUALY COMPLETE
AND PRODUCE ITS SHELL STATE
"H" NO. 2 WELL, LOCATED IN THE
NE/4 NE/4, SECTION 13, TOWNSHIP
21 SOUTH, RANGE 35 EAST, NMPM,
LEA COUNTY, NEW MEXICO, IN THE
EUNICE-MONUMENT POOL.

ORDER OF THE COMMISSION

BY THE COMMISSION:

This cause came on for hearing at 9 o'clock a. m. on November 20, 1952, at Santa Fe, New Mexico, before the Oil Conservation Commission, hereinafter referred to as the "Commission".

NOW, on this th 4 day of December, 1952, the Commission, a quorum being present, having considered the records and the testimony adduced, and being fully advised in the premises,

FINDS:

(1) That due notice having been given as required by law, the Commission has jurisdiction of the case and the persons and subject matter thereof.

(2) That applicant's Shell State "H", No. 2 Well, NE/4 NE/4, Section 13, Township 21 South, Range 35 East, NMPM, was completed in April, 1937, as an oil well producing from Seven Rivers-Queen formation in the open-hole interval 3800-3925 feet, having drilled through the Yates gas zone at an approximate depth of 3400-3700 feet.

(3) That although recent experiments tend to show that mechanical packers and other devices are ordinarily available for successful dual/multiple completions of oil - gas wells, the Commission is unconvinced of the soundness, as a waste-prevention practice, of such dual/multiple completions as a general practice in New Mexico without specific controls over each such project.

IT IS THEREFORE ORDERED:

That the applicant herein, Shell Oil Company, be, and it hereby is authorized to dually complete and produce its Shell State "H", No. 2 Well, NE/4 NE/4, Section 13, Township 21 South, Range 35 East, NMPM, Lea County, New Mexico, in such a manner that gas from the Yates formation may be produced through the annular space between the casing and the tubing, and oil from the Seven Rivers-Queen formation through the tubing by proper perforations and the installation of a proper packer or packers;

PROVIDED, HOWEVER, That subject well shall be completed, and thereafter produced, in such a manner that there will be no commingling within the well bore, either within or outside the casing of gas, oil and gas, or oil produced from either or both of the separate strata, and,

PROVIDED FURTHER, That said subject well for dual completion and production shall be equipped in such a way that reservoir pressures may be determined separately for each of the two specified strata, and further, be equipped with all necessary connections required to permit recording meters to be installed and used, at any time, as may be required by the Commission or its representatives, in order that natural gas, oil, or oil and gas from each separate stratum may be accurately measured and the gas-oil ratio thereof determined, and,

PROVIDED, FURTHER, That the operator applicant shall make any and all tests, including segregation tests, but not excluding other tests and/or determinations at any convenient time and in such manner as deemed necessary by the Commission; the original and all subsequent tests shall be witnessed by representatives of the Commission and by representatives of offset operators, if any there be, at their election, and the results of each test properly attested to by the applicant herein and all witnesses, and shall be filed with the Commission within ten (10) days after the completion of such test, and,

PROVIDED FURTHER, That upon the actual dual completion of such subject well, applicant shall submit to the Commission a diagrammatic sketch of the mechanical installation which was actually used to complete and produce the seal between the strata, and a special report of production, gas/oil ratio and reservoir pressure determination of each producing zone or stratum immediately following completion.

IT IS FURTHER ORDERED, That jurisdiction of this cause is hereby retained by the Commission for such further order or orders as may seem necessary or convenient for the prevention of waste and/or protection of correlative rights; upon failure of applicant to comply with any requirement of this order after proper notice and hearing, the Commission may terminate the authority hereby granted and require applicant or its successors and assigns to limit its activities to regular single-zone production in the interests of conservation.

DONE at Santa Fe, New Mexico, on the day and year hereinabove designated.

Attention: Debra Harris

Administrative Order NSL-3947(SD)

Dear Ms. Harris:

Reference is made to your application dated January 14, 1998, for two additional wells, one of which is considered to be located at an unorthodox gas well location, within an existing non-standard 320-acre gas spacing and proration unit ("GPU") in the Eumont Gas Pool.

Said GPU comprises the E/2 of Section 13, Township 21 South, Range 35 East, NMPM, Lea County, New Mexico, which was authorized by Division Administrative Order NSP-381, dated August 7, 1957 and had dedicated thereon the State "H" Well No. 4 (API No. 30-025-03466), located at a standard gas well location 1980 feet from the South line and 990 feet from the East line (Unit I) of said Section 13.

It is our understanding that the two subject wells to be considered in this application are both currently completed as oil wells in deeper horizons and upon issuance of this order will be recompleted up-hole into the Eumont Gas Pool. Pursuant to **Rule 2(b)4** of the "General Rules for the Prorated Gas Pools of New Mexico/Special Rules and Regulations for the Eumont Gas Pool," as promulgated by Division Order No. R-8170, as amended, the State "H" Well No. 3-Y (API No. 30-025-03472), located 2310 feet from the North line and 990 feet from the East line (Unit H) of said Section 13 is considered to be a "standard" gas well location for this particular 320-acre unit, however the State "H" Well No. 2 (API No. 30-02503465), located 660 feet from the North line and 1260 feet from the East line (Unit A) of said Section 13 is "unorthodox."

The subject application has been duly filed under the provisions of Rule 104.F of the General Rules and Regulations of the New Mexico Oil Conservation Division and the appropriate provisions of said Special Eumont Gas Pool rules.

By authority granted me under the provisions of **Rule 2(d)** of said special pool rules for the Eumont Gas Pool and Division General Rule 104.F(2) the above-described unorthodox Eumont gas well location for the State "H" Well No. 3-Y is hereby approved.

Also, you are hereby authorized to simultaneously dedicate Eumont gas production from the State "H" Well Nos. 2 and 3-Y with the State "H" Well No. 4. Furthermore, you are hereby

permitted to produce the allowable assigned the subject GPU from all three wells in any proportion.

All provisions of said Division Administrative Order NSP-381 shall remain in full force and effect until further notice.

Gentlemen:

Your application for special spacing, as set out in your letter of June 13, came before the Commission June 28. In view of the provisions of Order No. 21 adopted by the Commission March 20, 1936, and in view of the fact that the Shell Petroleum Corporation holds under State leases all units, any part of which are within 500 feet of the proposed exception location, the Commission granted the location in accordance with your application.

Dear Mr. Worden:

Enclosed is a letter from the Shell Petroleum Corporation regarding a proposed location in Section 13, Township 21 South, Range 35 East.

They are requesting permission to drill this well 980 feet south of the north line and 1260 feet west of the east line of Section 13, Township 21 South, Range 35 East. This proposed location, which is 1260 feet west of the east line, will be 60 feet east of the west line of the $SE\frac{1}{4}NE\frac{1}{4}$ of this section. This location is less than 330 feet from the boundary line of the unit and therefore will necessitate approval by the Oil Conservation Commission. In checking the records in the Hobbs office I found that the Shell well No. 2, immediately north, was also 1260 feet west of the east line and that this location was approved by the Oil Conservation Commission when Mr. Vesely was Land Commissioner.

As the Shell Petroleum Corporation owns the entire acreage in Section 13, but under two leases, this location will not be detrimental to any of the surrounding lease owners. Considering this location is 980 feet south of the Republic lease in Section 12 and it will be 1260 feet west of the Continental lease in 18, there should be no objection to this location.

I do not think it is necessary to hold a special hearing in regard to this location and if you will approve of this proposed location will you please notify Mr. E. L. Kimrey, District Superintendent, Shell Petroleum Corporation, Hobbs, New Mexico.

Very truly yours,

A. Andreas

July 5, 1957

Subject: Application for Exception to Rule 5 (a)
Order R-520, Shell State H Lease, Well
No. 4, Eumont Gas Pool, Lea County,
New Mexico

New Mexico Oil Conservation Commission
P. O. Box 871
Santa Fe, New Mexico

Gentlemen:

Under provisions of Commission Order No. R-520, Rule 5 (b), delegating the Secretary-Director of the Commission authority to grant exception to the requirements of Rule 5 (a) without notice and hearing for a non-standard gas proration unit, Shell Oil Company hereby applies for an exception to the aforementioned Rule for the Shell State H lease and the well Shell State H No. 4, Eumont Gas Pool.

It is requested that the 320-acre Shell State H lease consisting of the E/2 of Section 13, T-21-S, R-35-E, Lea County, New Mexico, which at present is designated as two 160-acre gas proration units with the producing gas wells being Shell State H No. 2 and Shell State H No. 4, be designated as a single 320-acre non-standard gas proration unit with the well Shell State H No. 4 to be the producing well for this non-standard proration unit.

In support of this application the following facts are submitted:

1. Shell State H No. 2 is located 1260 feet from the East line and 660 feet from the North line of Section 13, T-21-S, R-35-E and was originally completed as an oil well in April, 1937, flowing 350 BOPD from the open hole interval 3800-3925 feet.
2. An application to recomplate State H No. 2 as a gas-oil dual was approved by the Commission on December 4, 1952.
3. Subsequently the dual completion operation was completed on May 15, 1953, with the gross Eumont gas zone producing interval being 3265 to 3670 feet. On potential test the well flowed at the rate of 1400 MCFGPD and was assigned a 160-acre gas allowable.
4. Shell State H No. 4 is located 990 feet from the East line and 1980 feet from the South line of Section 13, T-21-S, R-35-E and was originally completed as an oil well in September, 1938, flowing 825 BOPD from the open hole interval 3767-3907 feet.
5. An application to recomplate State H No. 4 as a gas-oil dual was approved by the Commission on March 7, 1953. Subsequently the dual completion operation was completed on January 12, 1954, with the gross Eumont gas zone producing interval being 3320 to 3542 feet. On potential test the well flowed at the calculated rate of 5800 MCFGPD and was assigned a 160-acre allowable.
6. On January 1, 1957, Shell Oil Company completed State H No. 4-A as a replacement oil well for State H No. 4.

In view of the existence of the facts herein stated and compliance with the provisions of Rule 5 (b) of the Oil Conservation Commission Order No. R-520, Shell Oil Company requests that the Secretary of the Commission approve the above described non-standard gas proration unit.

Respectfully submitted,

SHELL OIL COMPANY

Re: Cancellation of DC established by
Order R-271

Attention: Mr. W. E. Owen

Gentlemen:

Reference is made to your Form C-103 dated April 1, 1957, in which the oil completion was abandoned in your State "H" Well No. 4, located in the NE/4 SE/4 of Section 13, Township 21 South, Range 35 East, Eumont Gas Pool. This well is now only a single completion as a gas well in the Eumont Gas Pool. Other records indicate that you drilled your well No. 4A in the same unit as an oil well in the Eumont Gas Pool to replace the prior oil completion in Well No. 4 in the Eumont Gas Pool.

This is to notify you that the dual completion of Well No. 4 established by Order R-271 issued February 27, 1953 is cancelled as of this date.

The basis for this cancellation is the recompletion of Well No. 4 as a single gas well in the Eumont Gas Pool and the drilling of Well No. 4A as a new oil well in the same unit in the Eumont Gas Pool to replace the oil completion in Well No. 4.

Yours very truly,

Administrative Order NSP-381

Attention: Mr. W. E. Owen

Gentlemen:

Reference is made to your application for approval of a 320-acre non-standard gas proration unit in the Eumont Gas Pool consisting of the following acreage:

Township 21 South, Range 35 East
E/2 of Section 13.

It is understood that this unit is to be ascribed to your State "H" Well No. 4, located 1980 feet from the South line and 990 feet from the East line and in the NE/4 SE/4 of Section 13, Township 21 South, Range 35 East, NMPM, Lea County, New Mexico.

By authority granted me under provisions of Rule 5, Section (b)-6 of the Special Rules and Regulations for the Eumont Gas Pool, as set forth in Order R-520, you are hereby authorized to operate the above described acreage as a non-standard gas proration unit, with allowable to be assigned thereto in accordance with Rule 8 of the pool rules, based upon the unit size of 320 acres effective September 1, 1957. The 160 acre gas allowable for Well No. 2 in the Eumont Gas Pool is cancelled as of September 1, 1957 and the net status of Well No. 2 will be assumed by Well No. 4 on that date.

IN THE MATTER OF THE HEARING
CALLED BY THE OIL CONSERVATION
COMMISSION OF NEW MEXICO FOR
THE PURPOSE OF CONSIDERING:

CASE NO. 433
ORDER NO. R-222

THE APPLICATION OF SHELL OIL
COMPANY FOR AN ORDER GRANTING
PERMISSION TO DUALY COMPLETE
AND PRODUCE ITS SHELL STATE
"H" NO. 2 WELL, LOCATED IN THE
NE/4 NE/4, SECTION 13, TOWNSHIP
21 SOUTH, RANGE 35 EAST, NMPM,
LEA COUNTY, NEW MEXICO, IN THE
EUNICE-MONUMENT POOL.

ORDER OF THE COMMISSION

BY THE COMMISSION:

This cause came on for hearing at 9 o'clock a. m. on November 20, 1952, at Santa Fe, New Mexico, before the Oil Conservation Commission, hereinafter referred to as the "Commission".

NOW, on this ¹⁸4 day of December, 1952, the Commission, a quorum being present, having considered the records and the testimony adduced, and being fully advised in the premises,

FINDS:

(1) That due notice having been given as required by law, the Commission has jurisdiction of the case and the persons and subject matter thereof.

(2) That applicant's Shell State "H", No. 2 Well, NE/4 NE/4, Section 13, Township 21 South, Range 35 East, NMPM, was completed in April, 1937, as an oil well producing from Seven Rivers-Queen formation in the open-hole interval 3800-3925 feet, having drilled through the Yates gas zone at an approximate depth of 3400-3700 feet.

(3) That although recent experiments tend to show that mechanical packers and other devices are ordinarily available for successful dual/multiple completions of oil - gas wells, the Commission is unconvinced of the soundness, as a waste-prevention practice, of such dual/multiple completions as a general practice in New Mexico without specific controls over each such project.

IT IS THEREFORE ORDERED:

That the applicant herein, Shell Oil Company, be, and it hereby is authorized to dually complete and produce its Shell State "H", No. 2 Well, NE/4 NE/4, Section 13, Township 21 South, Range 35 East, NMPM, Lea County, New Mexico, in such a manner that gas from the Yates formation may be produced through the annular space between the casing and the tubing, and oil from the Seven Rivers-Queen formation through the tubing by proper perforations and the installation of a proper packer or packers;

PROVIDED, HOWEVER, That subject well shall be completed, and thereafter produced, in such a manner that there will be no commingling within the well bore, either within or outside the casing of gas, oil and gas, or oil produced from either or both of the separate strata, and,

PROVIDED FURTHER, That said subject well for dual completion and production shall be equipped in such a way that reservoir pressures may be determined separately for each of the two specified strata, and further, be equipped with all necessary connections required to permit recording meters to be installed and used, at any time, as may be required by the Commission or its representatives, in order that natural gas, oil, or oil and gas from each separate stratum may be accurately measured and the gas-oil ratio thereof determined, and,

PROVIDED, FURTHER, That the operator applicant shall make any and all tests, including segregation tests, but not excluding other tests and/or determinations at any convenient time and in such manner as deemed necessary by the Commission; the original and all subsequent tests shall be witnessed by representatives of the Commission and by representatives of offset operators, if any there be, at their election, and the results of each test properly attested to by the applicant herein and all witnesses, and shall be filed with the Commission within ten (10) days after the completion of such test, and,

PROVIDED FURTHER, That upon the actual dual completion of such subject well, applicant shall submit to the Commission a diagrammatic sketch of the mechanical installation which was actually used to complete and produce the seal between the strata, and a special report of production, gas/oil ratio and reservoir pressure determination of each producing zone or stratum immediately following completion.

IT IS FURTHER ORDERED, That jurisdiction of this cause is hereby retained by the Commission for such further order or orders as may seem necessary or convenient for the prevention of waste and/or protection of correlative rights; upon failure of applicant to comply with any requirement of this order after proper notice and hearing, the Commission may terminate the authority hereby granted and require applicant or its successors and assigns to limit its activities to regular single-zone production in the interests of conservation.

DONE at Santa Fe, New Mexico, on the day and year hereinabove designated.

Attention: Debra Harris

Administrative Order NSL-3947(SD)

Dear Ms. Harris:

Reference is made to your application dated January 14, 1998, for two additional wells, one of which is considered to be located at an unorthodox gas well location, within an existing non-standard 320-acre gas spacing and proration unit ("GPU") in the Eumont Gas Pool.

Said GPU comprises the E/2 of Section 13, Township 21 South, Range 35 East, NMPM, Lea County, New Mexico, which was authorized by Division Administrative Order NSP-381, dated August 7, 1957 and had dedicated thereon the State "H" Well No. 4 (API No. 30-025-03466), located at a standard gas well location 1980 feet from the South line and 990 feet from the East line (Unit I) of said Section 13.

It is our understanding that the two subject wells to be considered in this application are both currently completed as oil wells in deeper horizons and upon issuance of this order will be recompleted up-hole into the Eumont Gas Pool. Pursuant to Rule 2(b)4 of the "General Rules for the Prorated Gas Pools of New Mexico/Special Rules and Regulations for the Eumont Gas Pool," as promulgated by Division Order No. R-8170, as amended, the State "H" Well No. 3-Y (API No. 30-025-03472), located 2310 feet from the North line and 990 feet from the East line (Unit H) of said Section 13 is considered to be a "standard" gas well location for this particular 320-acre unit, however the State "H" Well No. 2 (API No. 30-02503465), located 660 feet from the North line and 1260 feet from the East line (Unit A) of said Section 13 is "unorthodox."

The subject application has been duly filed under the provisions of Rule 104.F of the General Rules and Regulations of the New Mexico Oil Conservation Division and the appropriate provisions of said Special Eumont Gas Pool rules.

By authority granted me under the provisions of Rule 2(d) of said special pool rules for the Eumont Gas Pool and Division General Rule 104.F(2) the above-described unorthodox Eumont gas well location for the State "H" Well No. 3-Y is hereby approved.

Also, you are hereby authorized to simultaneously dedicate Eumont gas production from the State "H" Well Nos. 2 and 3-Y with the State "H" Well No. 4. Furthermore, you are hereby

permitted to produce the allowable assigned the subject GPU from all three wells in any proportion.

All provisions of said Division Administrative Order NSP-381 shall remain in full force and effect until further notice.

July 5, 1957

Subject: Application for Exception to Rule 5 (a)
Order R-520, Shell State H Lease, Well
No. 4, Eumont Gas Pool, Lea County,
New Mexico

New Mexico Oil Conservation Commission
P. O. Box 871
Santa Fe, New Mexico

Gentlemen:

Under provisions of Commission Order No. R-520, Rule 5 (b), delegating the Secretary-Director of the Commission authority to grant exception to the requirements of Rule 5 (a) without notice and hearing for a non-standard gas proration unit, Shell Oil Company hereby applies for an exception to the aforementioned Rule for the Shell State H lease and the well Shell State H No. 4, Eumont Gas Pool.

It is requested that the 320-acre Shell State H lease consisting of the E/2 of Section 13, T-21-S, R-35-E, Lea County, New Mexico, which at present is designated as two 160-acre gas proration units with the producing gas wells being Shell State H No. 2 and Shell State H No. 4, be designated as a single 320-acre non-standard gas proration unit with the well Shell State H No. 4 to be the producing well for this non-standard proration unit.

In support of this application the following facts are submitted:

1. Shell State H No. 2 is located 1260 feet from the East line and 660 feet from the North line of Section 13, T-21-S, R-35-E and was originally completed as an oil well in April, 1937, flowing 350 BOPD from the open hole interval 3800-3925 feet.
2. An application to recomplate State H No. 2 as a gas-oil dual was approved by the Commission on December 4, 1952.
3. Subsequently the dual completion operation was completed on May 15, 1953, with the gross Eumont gas zone producing interval being 3265 to 3670 feet. On potential test the well flowed at the rate of 1400 MCFGPD and was assigned a 160-acre gas allowable.
4. Shell State H No. 4 is located 990 feet from the East line and 1980 feet from the South line of Section 13, T-21-S, R-35-E and was originally completed as an oil well in September, 1938, flowing 825 BOPD from the open hole interval 3767-3907 feet.
5. An application to recomplate State H No. 4 as a gas-oil dual was approved by the Commission on March 7, 1953. Subsequently the dual completion operation was completed on January 12, 1954, with the gross Eumont gas zone producing interval being 3320 to 3542 feet. On potential test the well flowed at the calculated rate of 5800 MCFGPD and was assigned a 160-acre allowable.
6. On January 1, 1957, Shell Oil Company completed State H No. 4-A as a replacement oil well for State H No. 4.

In view of the existence of the facts herein stated and compliance with the provisions of Rule 5 (b) of the Oil Conservation Commission Order No. R-520, Shell Oil Company requests that the Secretary of the Commission approve the above described non-standard gas proration unit.

Respectfully submitted,

SHELL OIL COMPANY

Attention: Mr. W. E. Owen

Gentlemen:

Reference is made to your Form C-103 dated April 1, 1957, in which the oil completion was abandoned in your State "H" Well No. 4, located in the NE/4 SE/4 of Section 13, Township 21 South, Range 35 East, Eumont Gas Pool. This well is now only a single completion as a gas well in the Eumont Gas Pool. Other records indicate that you drilled your well No. 4A in the same unit as an oil well in the Eumont Gas Pool to replace the prior oil completion in Well No. 4 in the Eumont Gas Pool.

This is to notify you that the dual completion of Well No. 4 established by Order R-271 issued February 27, 1953 is cancelled as of this date.

The basis for this cancellation is the recompletion of Well No. 4 as a single gas well in the Eumont Gas Pool and the drilling of Well No. 4A as a new oil well in the same unit in the Eumont Gas Pool to replace the oil completion in Well No. 4.

Yours very truly,

Administrative Order NSP-381

Attention: Mr. W. E. Owen

Gentlemen:

Reference is made to your application for approval of a 320-acre non-standard gas proration unit in the Eumont Gas Pool consisting of the following acreage:

Township 21 South, Range 35 East
E/2 of Section 13.

It is understood that this unit is to be ascribed to your State "H" Well No. 4, located 1980 feet from the South line and 990 feet from the East line and in the NE/4 SE/4 of Section 13, Township 21 South, Range 35 East, NMPM, Lea County, New Mexico.

By authority granted me under provisions of Rule 5, Section (b)-6 of the Special Rules and Regulations for the Eumont Gas Pool, as set forth in Order R-520, you are hereby authorized to operate the above described acreage as a non-standard gas proration unit, with allowable to be assigned thereto in accordance with Rule 8 of the pool rules, based upon the unit size of 320 acres effective September 1, 1957. The 160 acre gas allowable for Well No. 2 in the Eumont Gas Pool is cancelled as of September 1, 1957 and the net status of Well No. 2 will be assumed by Well No. 4 on that date.

Very truly yours,
