**Describe Cause of Problem and Remedial Action Taken.\***

On July 16, 2015, at 2:30 PM Devon Lease Operator was checking his route and found that the bottom of a tank had corrosion and was leaking oil into the containment. There was a total of 6 bbls of oil leaked, 5 bbls were recovered, and the other was in the gravel.

**Describe Area Affected and Cleanup Action Taken.\***

Devon Lease Operator switched the production out of the leaking tank into another tank, he then emptied out the leaking tank into another tank. Legendary was called out to do cleanup and 5 bbls of oil were recovered. The other was in the gravel and unable to be recovered.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
