JUL 21 2015

If a Watercourse was Impacted, Describe Fully.*
NA

Describe Cause of Problem and Remedial Action Taken.*
Rock Water Energy was in the process of transferring treated water from the Hackberry 16 SWD 1 to the Strawberry 7 Fed Com 11H frac location when the lay flat transfer line shredded apart near the coupling causing approximately 75-100 barrels of treated water to release in the pasture. The area was approximately 22,000 square feet, 524 feet x 151 feet laying along the 2-track and flowing North of the 2-track.

RECEIVED

Describe Area Affected and Cleanup Action Taken.*
A vacuum truck was not able to reach the spill location due to the unsafe and impassable terrain. Talon was commissioned to inspect the spill area and submit a remediation plan for approval.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
