I need to notify you of a release that occurred on the above named lease. On 6/29/2015 we released 160 bbls of produced water into a containment. The release was due to corrosion of a steel water tank just above the load line collar. Of the 160 bbls released, only 20 bbls were recovered. This is a LINED facility, however once the gravel was removed from the containment several large holes were evident.

A C-141 will follow. Please advise as to the steps you'd like to see.

Christine Alderman
