If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*  
Packing gland on triplex pump failed, causing fluid to enter impervious containment. The containment failed on the east side and released one barrel of produced water. A vacuum truck was called to the location and recovered 48 barrels of PW from the containment.

Describe Area Affected and Cleanup Action Taken.\*  
A vacuum truck was called to the location and recovered 48 barrels of PW from the containment.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Mike/ Heather

BOPCO EHS was notified of a release that occurred on the PLU CVX JV BS 008H, a packing gland on the triplex pump failed and released fluid to the lined containment. A vacuum truck recovered all fluid from inside the containment (48 barrels), the containment had a small hole on the east side and about one barrel leaked out to the well pad. Can I send in one C-141 with initial and final? Please let me know if you have any questions. Thank you.
