<b>Was a Watercourse Reached?</b> <input type="checkbox"/> Yes <input type="checkbox"/> No	<b>If YES, Volume Impacting the Watercourse</b>	

**If a Watercourse was Impacted, Describe Fully.\***

**Describe Cause of Problem and Remedial Action Taken.\***  
On September 14, 2015 lease operator went to the Hackberry 18 Fed 1 and noticed the tanks were overflowing. The 2 phase separator at the Sirius 17 Fed 8 was swamped and was sending the fluid to the Hackberry 18 Fed 1 compressor. 400 bbls of oil and 70 bbls of produced water spilled into unlined containment. Standard Trucking was called to recover 397 bbls of oil and 68 bbls of produced water.

**Describe Area Affected and Cleanup Action Taken.\***  
The spill affected a 44'x80' area. Talon will do the cleanup for the remained of the 5 bbls.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
