Attention: William Jones

RE: SWD-965

Mr. Jones,

Please find enclosed a copy of the Radioactive Tracer Injection Profile Log which was performed on December 29, 2005.

The static fluid level in the well bore upon initial completion was approximately 1400', which translates into 1339 PSI at the top of the indicated injection zone.

If you have questions or need further information please do not hesitate to call.

Yours truly,

Scott Curtis
Operation Manager
Rice Operating

*Profile shows Fluid Leveling the well
≈ 4430' - 4504'
Open Hole inj internal ≈ 3906' - 5000'*
