Re: Burnt Mesa #2B
2040' FSL, 925' FWL, Section 26, T-32-N, R-07-W, San Juan County
30-045-33376

Dear Mr. Stogner:

Burlington Resources proposes to drill the above referenced well location as a commingled well in the Mesaverde and Dakota formations and is applying for administrative approval of an unorthodox gas well location for the Blanco Mesaverde and the Basin Dakota formations. This well is staked at an unorthodox location due to geology, utilities, archaeology and topography. In order to fit the geology of the surrounding Mesaverde, Dakota, and Fruitland Coal gas wells this location needed to be staked within a portion of the legal window that was heavily encompassed by archaeological sites along with above and underground utility lines. Steep terrain was also a limiting factor for placement of this well within a legal window, as shown on the attached aerial photography map.

The subject well has therefore been staked 2040 feet FSL and 925 feet FWL due to surrounding geology, archaeology and existing utilities in order to build a suitable location that would fit the existing topography.

The following attachments are for your review:

- Approved application for Permit to Drill and C-102 at referenced location
- Offset operators plat
- 9 Section plat
- Topographic Map
- Aerial Photography Map

Copies of this application are being submitted to offset operator / working interest owners by certified mail. Please let me know if you have any questions about this application.

Sincerely,

Joni Clark
Senior Regulatory Specialist

Re: Burnt Mesa #2B
