Mike,

I got a call earlier this week from Jeff Harvard of Harvard Petroleum Corp. requesting a response to their request for approval of a non-standard location. It seems that they will have a rig available in the next week or two and would like to begin work as soon as we can get them a response. He faxed over the information to me and probably sent you the request by mail, as well. Could you please get back with him at your earliest convenience and then let me know how it went. Mr. Harvard was aware that you would be out of the office this past week and was just curious as to how long the process might take. His phone number is 505-623-1581, ext. 102. If you haven't received a copy of the information, I will leave a copy under my nameplate on the front corner of my desk. Thanks for your assistance in this matter.

Daniel
