**San Juan 29-7 Unit #31A
Production Allocation**

Gas

| | | |
|------------------------|-------------|--------|
| *Mesaverde Production: | 255,896 Mcf | 49.3% |
| *Dakota Production | 263,342 Mcf | 50.7% |
| Total: | 519,238 | 100.0% |

Oil

| | | |
|------------------------|------------|--------|
| *Mesaverde Production: | 1,453 BBls | 57.0% |
| *Dakota Production | 1,094 BBls | 43.0% |
| Total: | 2,547 | 100.0% |

*Used 5 yrs production (93-97) even though the MV seemed to be liquid loaded from ~1990 to the present. The DK was either shut-in or logged off for extended periods of time during the late 1980's. Although 1985 seems to be a time when both the MV and DK were producing steadily, it was a time when the DK produced unusually more than the MV, and would lead to an erroneous production allocation.
