**RE: *Injection Pressure Increase
Southeast Maljamar Grayburg/San Andres
Unit Well No. 106
API No. 30-025-33353
Lea County, New Mexico***

Dear Ms. Courtney:

Reference is made to your request dated July 9, 2003 to increase the surface injection pressure on the above referenced well. This request is based on a step rate test conducted on the well on June 2, 2003. The results of the test have been reviewed by my staff and we feel an increase in injection pressure on this well is justified at this time.

You are therefore authorized to increase the surface injection pressure on the following well:

<i>Well and Location</i>	<i>Maximum Surface Injection Pressure using 2-3/8" PC tubing</i>
Southeast Maljamar Grayburg/San Andres Unit Well No. 106	1900 PSIG
Located in Unit P of Section 30, Township 17 South, Range 33 East, Lea County, New Mexico.	

Injection Pressure Increase

XTO Energy Inc.

SEMGBSAU No. 106

July 9, 2003

The Division Director may rescind this injection pressure increase if it becomes apparent that the injected water is not being confined to the injection zone or is endangering any fresh water aquifers.

Sincerely,

Handwritten signature of Lori Wrotenberg in cursive, with the initials "LW" in parentheses at the end.

Lori Wrotenberg
Director
