Bad hatch on top of tank, tank was full and equalizing. Wind was blowing hard.

Describe Area Affected and Cleanup Action Taken.*

Sprayed mist across battery and off NE corner of pad. Well shut down. Picked up contaminated soil and hauled to Saunders land farm. Will assess to see if further remediation will be necessary.

Average Depth to Water: 113'

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
