Describe Cause of Problem and Remedial Action Taken.*

A 3 inch metal transition developed a hole resulting in the release. The flow line was isolated and repaired.

Describe Area Affected and Cleanup Action Taken.*

The release affected total of 695 square feet with 100 square feet of pasture and 595 square feet on lease road and NM state pit 337. The area was mapped and initial field sampling was conducted. The state land office was notified due to contamination in pit 337.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
