Describe Cause of Problem and Remedial Action Taken.*
Power failure at location caused the transfer pump to lose power and the high level alarm did not work. Alarm has been inspected and repaired.

Describe Area Affected and Cleanup Action Taken.*
Spill was contained within the firewall. Affected area is 60'x100'. All standing fluid has been picked up. Area will be assessed and remediated according to approved work plan.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Subject: Release at the Gissler B 3-3 Tank Battery | API # 30-015-41276

Shelly/Heather,

To follow up on my earlier phone call/voice mail, we had a release last night (10/14/15) at the Gissler B 3-3 Tank Battery. We had an electrical problem and the water tank overflowed. The majority of the overflow was produced water and was contained within the fire wall. We are currently working on recovering the fluid.

Once I have all the details, I will submit a C-141. Feel free to give me a call on my cell if you have any questions.

Thank you

Leslie Garvis
