**Re: Work Plan for the COG Operating LLC., Muskegon 16 State Com #1 Tank Battery, Unit N, Section 16, Township 17 South, Range 29 East, Eddy County, New Mexico.**

Mr. Bratcher:

Tetra Tech Inc. (Tetra Tech) was contacted by COG Operating LLC. (COG) to assess a spill at the Muskegon 16 State Com #1 Tank Battery located in Unit N, Section 16, Township 17 South, Range 29 East, Eddy County, New Mexico (Site). The spill site coordinates are N 32.82888°, W 104.08204°. The site location is shown on Figures 1 and 2.

### Background

According to the State of New Mexico C-141 Initial Report, the leak was discovered on October 28, 2009. Approximately ten (10) barrels of crude oil and forty (40) barrels of produced water were released due to a pump malfunction and a tank overflowing. Vacuum trucks were utilized to recover five (5) barrels of crude oil and thirty (30) barrels of standing fluids. The initial C-141 is included in Appendix A.

### Groundwater

A water well located in Section 22, Township 17 South, Range 29 East, was measured using a steel tape to gauge the depth to water. The water well was not in use at the time and the static depth to water was measured at approximately 82.0'. The United States Geological Survey (USGS) database did show a well in Section 22, Township 17 South, Range 29 East with reported depth to water of 80' below surface. The Geology and Groundwater Resources of Eddy County, New Mexico showed a well in Section 22, Township 17 South, Range 29 East to have been measured with a depth to water of 79.7' below surface. Copies of the well data are included in Appendix B.

## Regulatory

A risk-based evaluation was performed for the Site in accordance with the New Mexico Oil Conservation Division (NMOCD) Guidelines for Remediation of Leaks, Spills and Releases, dated August 13, 1993. The guidelines require a risk-based evaluation of the site to determine recommended remedial action levels (RRAL) for benzene, toluene, ethylbenzene and xylene (collectively referred to as BTEX) and total petroleum hydrocarbons (TPH) in soil. The proposed RRAL for benzene was determined to be 10 parts per million (ppm) or milligrams per kilogram (mg/kg) and 50 ppm for total BTEX (sum of benzene, toluene, ethylbenzene, and xylene). Based upon the depth to groundwater, the proposed RRAL for TPH is 1,000 mg/kg. ✓

## Soil Assessment and Results

On November 10, 2009, Tetra Tech personnel inspected the spill area. The spill originated from an open water tank and migrated north of the pad, at a width of approximately 5.0'. The spill then migrated off the pad along the southeast edge of the closed reserve pit and down the lease road (1.0' wide), which had been back dragged with a backhoe. A total of seven (7) auger holes (AH-1 through AH-7) were installed using a stainless steel hand auger to assess the impacted soils. Select samples were analyzed for TPH analysis by EPA method 8015 modified, BTEX by EPA Method 8021B and chloride by EPA method 300.0. The auger hole locations are shown on Figure 3. Copies of laboratory analysis and chain-of-custody documentation are included in Appendix C. The results of the sampling are summarized in Table 1.

Referring to Table 1, all submitted samples were below the RRAL for TPH and BTEX. On the pad, elevated chloride concentrations were detected in AH-4 and AH-5 and were not vertically defined at 7-7.5' and 4.0', respectively. The area of AH-7 (reserve pit) did show a chloride impact to the soils. However, this may be from the former reserve pit area.

On February 10, 2010, Tetra Tech personnel were onsite to install one (1) soil boring (SB-1) utilizing an air rotary rig. SB-1 was installed between the previous auger holes (AH-4 and AH-5), which were not vertically defined. The soil boring was extended to a maximum depth of 31' feet bgs, with samples collected at 2 to 3 foot intervals for the first 10 feet and 5 foot intervals thereafter. The samples were submitted to the laboratory for analysis of chlorides. Copies of laboratory analysis and chain-of-custody documentation are included in Appendix C. The soil boring results are summarized in Table 2. The soil boring location is shown on Figure 3.

Referring to Table 2, the chloride concentrations ranged from <200 mg/kg at 15.0' to 1,700 mg/kg at 0-1'. The chloride concentrations declined with depth to <200 mg/kg at 15' below surface.

**TETRA TECH**

### **Work Plan**

Based on the data, the chloride impact at AH-4 and AH-5 originally showed elevated chloride impact to the soils. However, the soil boring between the two auger holes showed a reduced impact to the soils. Based upon the assessment, COG proposes to excavate the chloride impacted areas. The areas of AH-2 and AH-6 will be excavated to approximately 2.0' below surface and areas of AH-4 and AH-5 to a depth of 10.0' below surface. Once completed, the excavated soils will be hauled to proper disposal and backfill with clean soil. The excavated areas are shown on Figure 4.

If you require any additional information or have any questions or comments concerning this work plan, please call at (432) 682-4559.

Respectfully submitted,  
TETRA TECH

If a Watercourse was Impacted, Describe Fully.\*

#### Describe Cause of Problem and Remedial Action Taken.\*

The tank overflowed due to a pump malfunction.

#### Describe Area Affected and Cleanup Action Taken.\*

The release stayed on the pad and entrance road.  
Tetra Tech will sample the spill site area to delineate any possible contamination from the release and we will present a remediation work plan to the NMOCD for your approval prior to any significant remediation work.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

These results represent only the samples received in the laboratory. The Quality Control Report is generated on a batch basis. All information contained in this report is for the analytical batch(es) in which your sample(s) were analyzed.

This report consists of a total of 30 pages and shall not be reproduced except in its entirety, without written approval of TraceAnalysis, Inc.

Dr. Blair Leftwich, Director  
Dr. Michael Abel, Project Manager

#### Standard Flags

B - The sample contains less than ten times the concentration found in the method blank.

## Case Narrative

Samples for project COG/Muskegon 16 State Com. #1 were received by TraceAnalysis, Inc. on 2009-11-13 and assigned to work order 9111610. Samples for work order 9111610 were received intact at a temperature of 8.2 deg. C.

Samples were analyzed for the following tests using their respective methods.

| Test                 | Method       | Prep Batch | Prep Date           | QC Batch | Analysis Date       |
|----------------------|--------------|------------|---------------------|----------|---------------------|
| BTEX                 | S 8021B      | 55928      | 2009-11-19 at 11:00 | 65456    | 2009-11-19 at 23:56 |
| Chloride (Titration) | SM 4500-Cl B | 55855      | 2009-11-17 at 12:50 | 65389    | 2009-11-18 at 14:45 |
| Chloride (Titration) | SM 4500-Cl B | 55856      | 2009-11-17 at 12:50 | 65390    | 2009-11-18 at 14:46 |
| Chloride (Titration) | SM 4500-Cl B | 55857      | 2009-11-17 at 12:51 | 65391    | 2009-11-18 at 14:47 |
| Chloride (Titration) | SM 4500-Cl B | 55858      | 2009-11-17 at 12:52 | 65380    | 2009-11-18 at 11:03 |
| TPH DRO - NEW        | Mod. 8015B   | 55834      | 2009-11-16 at 15:56 | 65341    | 2009-11-16 at 15:56 |
| TPH GRO              | S 8015B      | 55928      | 2009-11-19 at 11:00 | 65457    | 2009-11-20 at 00:23 |

Results for these samples are reported on a wet weight basis unless data package indicates otherwise.

A matrix spike (MS) and matrix spike duplicate (MSD) sample is chosen at random from each preparation batch. The MS and MSD will indicate if a site specific matrix problem is occurring, however, it may not pertain to the samples for work order 9111610 since the sample was chosen at random. Therefore, the validity of the analytical data reported has been determined by the laboratory control sample (LCS) and the method blank (MB). These quality control measures are performed with each preparation batch to ensure data integrity.

All other exceptions associated with this report have been footnoted on the appropriate analytical page to assist in general data comprehension. Please contact the laboratory directly if there are any questions regarding this project.

Report Date: February 19, 2010

Work Order: 10021125

Project Location: Eddy Co., NM  
Project Name: COG/Muskegon 16 State Com. #1  
Project Number: 114-6400354

Enclosed are the Analytical Report and Quality Control Report for the following sample(s) submitted to TraceAnalysis, Inc.

| Sample | Description  | Matrix | Date Taken | Time Taken | Date Received |
|--------|--------------|--------|------------|------------|---------------|
| 222098 | SB-1 1'-2'   | soil   | 2010-02-10 | 00:00      | 2010-02-11    |
| 222099 | SB-1 3'-4'   | soil   | 2010-02-10 | 00:00      | 2010-02-11    |
| 222100 | SB-1 5'-6'   | soil   | 2010-02-10 | 00:00      | 2010-02-11    |
| 222101 | SB-1 7'-8'   | soil   | 2010-02-10 | 00:00      | 2010-02-11    |
| 222102 | SB-1 10'-11' | soil   | 2010-02-10 | 00:00      | 2010-02-11    |
| 222103 | SB-1 15'-16' | soil   | 2010-02-10 | 00:00      | 2010-02-11    |
| 222104 | SB-1 20'-21' | soil   | 2010-02-10 | 00:00      | 2010-02-11    |
| 222105 | SB-1 25'-26' | soil   | 2010-02-10 | 00:00      | 2010-02-11    |
| 222106 | SB-1 30'-31' | soil   | 2010-02-10 | 00:00      | 2010-02-11    |

These results represent only the samples received in the laboratory. The Quality Control Report is generated on a batch basis. All information contained in this report is for the analytical batch(es) in which your sample(s) were analyzed.

This report consists of a total of 9 pages and shall not be reproduced except in its entirety, without written approval of TraceAnalysis, Inc.

---

Dr. Blair Leftwich, Director  
Dr. Michael Abel, Project Manager

**Standard Flags**

**B** - The sample contains less than ten times the concentration found in the method blank.

## Case Narrative

Samples for project COG/Muskegon 16 State Com. #1 were received by TraceAnalysis, Inc. on 2010-02-11 and assigned to work order 10021125. Samples for work order 10021125 were received intact at a temperature of 4.0 C.

Samples were analyzed for the following tests using their respective methods.

| Test                 | Method       | Prep Batch | Prep Date           | QC Batch | Analysis Date       |
|----------------------|--------------|------------|---------------------|----------|---------------------|
| Chloride (Titration) | SM 4500-Cl B | 57778      | 2010-02-16 at 09:22 | 67597    | 2010-02-17 at 15:22 |
| Chloride (Titration) | SM 4500-Cl B | 57779      | 2010-02-16 at 09:23 | 67598    | 2010-02-17 at 15:24 |

Results for these samples are reported on a wet weight basis unless data package indicates otherwise.

A matrix spike (MS) and matrix spike duplicate (MSD) sample is chosen at random from each preparation batch. The MS and MSD will indicate if a site specific matrix problem is occurring, however, it may not pertain to the samples for work order 10021125 since the sample was chosen at random. Therefore, the validity of the analytical data reported has been determined by the laboratory control sample (LCS) and the method blank (MB). These quality control measures are performed with each preparation batch to ensure data integrity.

All other exceptions associated with this report have been footnoted on the appropriate analytical page to assist in general data comprehension. Please contact the laboratory directly if there are any questions regarding this project.

### Laboratory Control Spike (LCS-1)

QC Batch: 67597      Date Analyzed: 2010-02-17      Analyzed By: AR  
Prep Batch: 57778      QC Preparation: 2010-02-16      Prepared By: AR

| Param    | LCS Result | Units | Dil. | Spike Amount | Matrix Result | Rec. | Rec. Limit |
|----------|------------|-------|------|--------------|---------------|------|------------|
| Chloride | 98.0       | mg/Kg | 1    | 100          | <2.18         | 98   | 85 - 115   |

Percent recovery is based on the spike result. RPD is based on the spike and spike duplicate result.

| Param    | LCSD Result | Units | Dil. | Spike Amount | Matrix Result | Rec. | Rec. Limit | RPD | RPD Limit |
|----------|-------------|-------|------|--------------|---------------|------|------------|-----|-----------|
| Chloride | 99.9        | mg/Kg | 1    | 100          | <2.18         | 100  | 85 - 115   | 2   | 20        |

Percent recovery is based on the spike result. RPD is based on the spike and spike duplicate result.

### Laboratory Control Spike (LCS-1)

QC Batch: 67598      Date Analyzed: 2010-02-17      Analyzed By: AR  
Prep Batch: 57779      QC Preparation: 2010-02-16      Prepared By: AR

| Param    | LCS Result | Units | Dil. | Spike Amount | Matrix Result | Rec. | Rec. Limit |
|----------|------------|-------|------|--------------|---------------|------|------------|
| Chloride | 99.7       | mg/Kg | 1    | 100          | <2.18         | 100  | 85 - 115   |

Percent recovery is based on the spike result. RPD is based on the spike and spike duplicate result.

| Param    | LCSD Result | Units | Dil. | Spike Amount | Matrix Result | Rec. | Rec. Limit | RPD | RPD Limit |
|----------|-------------|-------|------|--------------|---------------|------|------------|-----|-----------|
| Chloride | 102         | mg/Kg | 1    | 100          | <2.18         | 102  | 85 - 115   | 2   | 20        |

Percent recovery is based on the spike result. RPD is based on the spike and spike duplicate result.

### Matrix Spike (MS-1) Spiked Sample: 222105

QC Batch: 67597      Date Analyzed: 2010-02-17      Analyzed By: AR  
Prep Batch: 57778      QC Preparation: 2010-02-16      Prepared By: AR

| Param    | MS Result | Units | Dil. | Spike Amount | Matrix Result | Rec. | Rec. Limit |
|----------|-----------|-------|------|--------------|---------------|------|------------|
| Chloride | 10100     | mg/Kg | 100  | 10000        | <218          | 101  | 85 - 115   |

Percent recovery is based on the spike result. RPD is based on the spike and spike duplicate result.

| Param    | MSD Result | Units | Dil. | Spike Amount | Matrix Result | Rec. | Rec. Limit | RPD | RPD Limit |
|----------|------------|-------|------|--------------|---------------|------|------------|-----|-----------|
| Chloride | 10300      | mg/Kg | 100  | 10000        | <218          | 103  | 85 - 115   | 2   | 20        |

Percent recovery is based on the spike result. RPD is based on the spike and spike duplicate result.
