NATURE OF RELEASE

Type of Release Oil and Water	Volume of Release 26 BBLS	Volume Recovered 24 BBLS
Source of Release Leaking Firetube Gasket	Date and Hour of Occurrence 10/19/2015 Early Morning	Date and Hour of Discovery 10/19/2015 10:00 AM
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Shelley Tucker of the BLM on 10/19/2015 and Heather Patterson of OCD on 10/20/2015	
By Whom? Bill Dougherty	Date and Hour 10/19/2015 10:15 AM	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*

The firetube gasket on the Heater Treater leaked.  
A Double R Vacuum truck arrived on location 10:15 AM.

Describe Area Affected and Cleanup Action Taken.\*

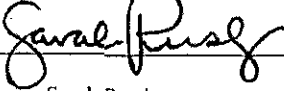

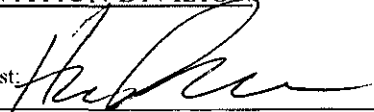

Approx. 24 BBLS of oil and produced water were released into the separation equipment berm, which borders the location edge. Separation berm is lined with plastic. Approx. 2 BBL of spray and run off got off of location.

A double R vacuum truck sucked up all oil and produced water inside the berm and put back in production tanks.

Contaminated soil will be scraped up and hauled to disposal site (R360), and then NGP will take a sample of the soil where the run off/over-spray occurred. Sample will be sent to Trace Analysis for analysis and sample results will be sent to Shelly Tucker of the BLM. Pending sample results, additional remediation, if any is needed, will be performed. A final C-141 will be submitted with location pictures after all remediation work is finished.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
