If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*

A 1/4" plug vibrated out of a water transfer pump causing water to spill inside of the 0 perm containment and sprayed outside on the ground. The plug was replaced.

Describe Area Affected and Cleanup Action Taken.\*

Approximately 1800 sq. ft of tank battery pad and approximately 400 sq. ft. of pasture. The free standing fluid was recovered. The spill area will be remediated according to the NMOCD and BLM remediation guidelines.

*The spill was remediated in conjunction with a pit remediation and re-cap for the Hudson Federal #1 well, and the Hudson Federal #7 pumping well. A C-144 was submitted and approved for a trench burial for some of the pit material; a separate C-105 was filed for the pit closure. Please reference the Closure Request dated December 2014.*

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
