Subject: West Artesia Grayburg Unit C141 Followup

Mike,

We have now experienced 3 leaks on the referenced unit. All have had C-141's submitted. A phone message was left for you as soon as the new leaks were discovered and C141's were timely filed. We have contacted Talon LPE in Artesia to do soil testing and help us with our remediation plan. Please contact Al Perry (cell 575-703-0900) or I (cell 432-770-9738) with any questions. We will work with Talon and you to get the remediation done in a timely manner.

Regards
Marty Bloodworth
